

Product advantages:

- Easy junction of several solar module strings
- Easy installation
- Advanced system safety
- Overvoltage protection
- High protection class: IP65

ASJB6

ASJB6L
Asantys Systems PV-Junction Boxes

Asantys Systems PV-Junction Boxes are especially designed for the use in solar photovoltaic systems, such as solar home systems, water pumping systems or telecommunication systems. Using the ASJB product series ensures you clean and easy installations as well as system reliability for many years.

The products of the ASJB series are available with lightning protection in order to assure highest operational safety. Our standard product range is available with 20-80 A, for two to eight solar module strings. Customized junction boxes are available on request.
